

Nota Bene

Software for academic research and writing

Move seamlessly from online research, to your bibliographic data, to notes taken years ago, to the paper you are writing now.

Nota Bene Workstation: Nota Bene provides an integrated system for academic research and writing. It includes the programs pictured above, conversion to/from other formats, and more. Available for Windows or Mac.

Lingua: Add Lingua for Nota Bene's legendary support for Hebrew, Greek, Cyrillic, Arabic and more.

Orbis+: Orbis is included in Nota Bene Workstation. It will search your .NB files and present retrieved text for you to review and/or insert in your open document. Add Orbis+ to include RTF, DOC, DOCX, RTF and HTML files in your Orbis searches.

Archiva+: Archiva is included in Nota Bene Workstation. It will retrieve citations from online databases and add bibliographic records to your Ibidem database. Add Archiva+ to convert formatted bibliographies or ISBN numbers to Ibidem records.

Radius: Add Radius to capture web pages for academic or personal use. Captured pages will be saved and organized both as structured data for access in Ibidem and as free-form text searchable by Orbis.

25% off! Use Group Code NBNP

25% off for new purchases of Nota Bene Workstation. Student discount and discounts for add-on modules also available.

"When I take on new graduate students, I always ask them what software they're using. I tell them what they need in their software (not least, in Biblical Studies, the ancient languages – but also the reference tools, the bibliography, and so much more), and how Nota Bene provides exactly that. It will do everything you can think of and want, and plenty more besides."
N.T. Wright, University of St. Andrews
See www.notabene.com/NBAuthors.html

"Nota Bene was a lifesaver during my time in seminary and my PhD program. I couldn't have survived without it! I was able to effortlessly format all of my school papers and my PhD dissertation, cite my sources with Ibidem, and find all my research at my fingertips using Orbis. I couldn't imagine writing an academic paper without it!" Dr. Nathan Parker, Accordance Bible Software

"I have used Nota Bene since the mid-1980s for the simple reason that it is the only program suited to the needs of serious scholarship." R. Howard Bloch, Yale University

"I have found that exporting references from journal websites to Ibidem in RIS formats works like a dream and has saved me countless hours of effort." David Wolfe, University of Toronto

"I strongly recommend that new scholars (or veteran scholars beginning new projects) invest a little bit of time getting to know Orbis and planning a note-taking strategy to make maximum use of it." Gerald W. Schlabach, University of St. Thomas
